### ABOUT ME

I'm a junior web developer. I started learning around 2015, first on a self-taught mode until I started my vocational training in 2020.

I've always thought programming is a little bit like magic: even the simplest tricks can be surprising.

That is also why I would love to continue on this path. It keeps my curiosity and eagerness to keep on learning.

### LANGUAGES

Spanish Native

Catalan Native

English Professional

B2 title: 2019
